The Ultimate Guide:

Web & App; Web to App Services

Here at Entorcify, our comprehensive design and development services offer tailored solutions for websites and mobile apps. From conceptualization to implementation, we create user-friendly interfaces with captivating visuals. Additionally, we specialize in converting websites into seamless iOS and Android apps, providing a seamless transition between platforms.

We go further in our writing technique as we help students in carrying out their projects irrespective of their course of study; and of course, for an affordable price! Contact our support channel for more information.

But why do you need an app if you already have a website?

Here are some benefits of having an app for your website:

Stand out from the competition: It is easier for your customers to remember your products and services with your app on their phones. This would help you retain them and not lose them to other businesses.

Gain more Trust: It is without doubt that people tend to trust businesses with apps on stores than businesses with just websites.

Increased brand visibility: Having an app on stores can significantly increase your brand's exposure and credibility.

Improved user experience: Mobile apps are more user-friendly than mobile websites, which means your audience is more likely to engage with your content.

Increased customer engagement: With push notifications, you can stay connected with your audience and keep them engaged.

Convenience and Accessibility: Mobile apps provide easy and quick access to your services, products, or content, anytime and anywhere, right at users' fingertips.

Competitive Advantage: Stand out from competitors who may still rely solely on mobile websites. Offering a mobile app demonstrates your commitment to innovation and customer satisfaction.

Here's how it works:

STEP 1:

You provide us with your website URL

STEP 2:

Our team of experienced developers will analyze your website's structure and design a customized android app that's optimized for user experience.

STEP 3:

Once the app is ready, we'll provide you with the necessary files for uploading to respective stores. We also help in submitting apps to the iOS store and Google Play Store, making it easily accessible to more audience.

Auto-Synchronize

Apps keep itself always synchronized with latest content from your website. All changes reflects live!

Deep Linking

When a user clicks on your website link, they are taken directly to the relevant screen or content within your app. This increases engagement.

Allows External link

Your users may not leave necessary leave your app if they click on an external link. This allows you to retain your customers.

Push Notification

Send alert to users about important updates, events, or offers, even when they're not actively using your app

Frequently Asked Questions

- 

Is this a monthly or yearly payment?

It is a one-time payment for either the standard or premium package.
- 

What is the difference between the Standard and Premium Package?

In Standard package, the app will not be uploaded to the stores while in Premium package the app will be uploaded to respective stores.
- 

How long will it take for my app to be ready?

Within 24-72 hours after receiving your payment.
- 

For how long will my app be available on stores if I choose Premium?

Forever! However, your app may be removed by the stores if you violate the Google Policy or the Apple Policy which we will give to you.
- 

Will I see my app before it's uploaded to the stores?

Yes. You will receive the necessary files which you can install and test on your phone.
- 

Will my app be automatically updated by my website when I make any changes on my website?

Yes. Your app auto-synchronizes with your website and so you so don't do any work on the app.
